Hired a person for the permanent Building and Grounds position that was open.

Notable Issues/Events:

• The Town is actively mitigating for Mormon Crickets. We are still using a bait called Eco Bran. The crickets ingest this bait. We have been largely successful in keeping the crickets away from the businesses and residential dwellings in Town. This does not by any means that there are not any crickets that make it into these areas, but considering the vast numbers of them that are outside our residential areas, we have killed a very large percentage of them before they have reached these areas.

Water/Wastewater - Submitted by Michael Dillon/Donald Reed

Project status/Current Issues:

Water Treatment Plant:

- Flow in the White River flowing just over 1070 CFS as of July 1st, well above the median flow of 700 CFS for this time of year.
- Snowpack in the White River Basin is at 0%, which is normal for this time of year.
- Average daily water output from the plant in June was 808k gallons.
- Ducey's was able to install the VFD for pump #3, however the pump will likely need to be sent in to be refurbished for sitting idle for over 2 years.
- Compliance samples and reports were submitted with no violations.
- We were awarded the grant from DOLA for the tank mixers, radios, and river pump rebuild. Once we have the contract in hand, we will begin working on the projects as outlined in the grant.
- The Town has scheduled for a sanitary survey by CDPHE in early August.
- We have made huge progress on the service line material inventory that is required by the new Lead and Copper rule that will take effect in October of this year. We've only got around 90 unknown service lines left and have sent out self-assessments to those addresses to verify the service line materials. We've requested that the surveys are returned by the middle of July. Whatever surveys we don't receive, we will label those service lines as unknown. According to Sunrise engineering, we will need to verify the material of only 20% of these unknown service lines by the end of 2025.
- Our 2023 Consumer Confidence report has been submitted and made public.
- Our fluoride system has been having issues with clogging. We've consulted CDPHE to ask about connecting a
 water heater to the feed line for the system and they said that would be fine.
- We repaired the leak in the side of our hypochlorite tank, but there are a few PVC lines that are starting to leak where the pipe is connecting to Unistrut. We will try to repair what we can, but will likely need to replace some significant sections of this line due to its age.

Wastewater Plant:

- The town supplied flow meter for the new headworks plant was received and installed.
- Lifting chains for the influent pumps at the new headworks have been ordered and installed.
- We are at the point in the summer where our UV system struggles to maintain due to water quality coming from the ponds. We are aware of this and for the rest of the summer, maintenance will be more frequent to protect our equipment and effluent water quality.
- The 2025 Eligibility survey was completed and submitted for the State Revolving Fund.
- Compliance samples for June were collected and analyzed with no violations. May's DMR was completed and submitted.

Utility Department Activities:

- We had 23 locates, meter reads and rereads, work orders, high/low usage report.
- Half-Turn water line project has been awarded to TDA out of Meeker. They are looking to begin work on the line
 in the first or second week of July.

- Michael Dillon is still providing ORC coverage for the Town of Dinosaur.
- There have been a few issues with the raw water pumps that feed the raw water tank. We were able to make all repairs without having to shut the system down.

Personnel issues:

• The Utilities department was finally able to get a seasonal hire in the middle of June.
