Notable Issues/events:

Water/Wastewater – Submitted by Donald Reed

Project status/Current Issues:

Water Treatment Plant:

- The Water Treatment Plant has now been set up for winter operations. We drained both sedimentation tanks for cleaning prior to winter ops. Water production has slowed down to the tune of 256,000 gallons per day as an average. During the month, we had some problems with the manufacturing of chlorine do to pump problems with the system, those problems have been resolved. The department will start with our annual maintenance program in December.
- Down River Extension Project---There has been several meetings regarding this project, and it currently looks like sometime late next year we should see a preliminary proposal from the Water Conservancy District. For them to get the proposal the town will need to set the terms and rate structure of the agreement. Which we are working on, but still have a ways to go. We are enabling them to make this project happen with as much support as possible.

- Currently were waiting on final approval of the 2022 budget before proceeding on any projects.
- The La Mesa project is in the process of being closed out, everyone is relieved that this project is now behind us and all involved did a great job.
- Will continue working on upgrading the Utilities Master Plan. We are still extremely busy but should have in completed by Spring of 2022.
- The consecutive water agreement that was on the table with Chevron is now off. Lisa will be approaching the new owners with this proposal. Colorado State criteria still apply to this portion of the water distribution system in meeting with state compliances. The department will continue with the weekly testing if allowed, and by the end of the year we will have to inform State on the status of the agreement.
- Water loss for the month of November was a 11.2%. The department will continue in our efforts to reduce water loss, we have isolated that most of the town loss is in the middle zone distribution area which is a big help in moving forward and narrowing down the scope of area.
- Held a training session with the Dispatch department as to types of call outs and procedures for the Utilities Department and the Gas department. Mike put together a power point presentation which will be able to assist in training of new dispatch personal.
- Worked on Bulk Water system repairs.
- Monthly compliance reports were sent to state with no violations being noted. Also completed the annual water consumption report for the Department of Natural Resources.
- The Backflow and Cross Connection program has been completed for 2021 and the closing of the annual report will be completed and sent by January 10th, 2022.
- Department has continued working on the details and pricing of numerous projects that are slated over the next few years, this is a slow process and takes times too make the best decisions as to what direction we need to go on these projects, also looking at different firms for engineering of these projects along with representation for grants that will be needed. Jocelyn is in the loop and advising as we move along this path.

Wastewater Plant:

- Head Works Building Project—After a great deal of reworking and renegotiate cutbacks on the project we were able to award the contract to Mueller Construction Co. To do this we only allowed for rough ins on electrical and heating until additional funding could be acquired. In December we will be asking DOLA for additional funding since pricing of materials has gone up on the project or reapply for funding in the Spring of 2022. Some line items of the contract were dropped and will be picked up by the Utility department staff so the project would be fully completed. The Pre-con meeting is scheduled for Dec 14th, 2021.
- Worked on locating all infrastructure in designated work site and checking on levels of table water for excavation This took several days to complete since there were only vague drawings of the said site. All information was recorded and sent to engineering for assessment.
- Continued working in the Headworks building had problems with mechanical system in several areas, mainly had electrical problems with old wiring with low resistance, had to strip out old wiring and replace it. Still having problems with the main building heater and will keep looking into getting it fixed.
- State Compliance Reports were sent out with no violations.

Utility Department Activities:

- Had 39 Locates, meter reads and rereads, 3 Work orders. High/Low usage report.
- Responded to 2 sewer line blockages, fortunately no SSO were noted.
- Assisted Public works on locating other underground utilities services on La Mesa.
- Attended water loss prevention classes.
- Attended meetings with PAC and the Uintah Basin Round Table meeting.

Dear Mrs. Piering,

State statute C.R.S. 39-1-111(5), requires the Assessor to recertify the County's value by December 10, 2021. This recertification is necessary due to value changes that occurred after August 25, 2021. These modifications are a result of factors that are not under the control of the Assessor's office. The new value is the value that will be used to determine the tax rate for your district.

As required by C.R.S. 39-5-128(1), I submit herewith the Assessed and Actual Values for your authority, assessed by me for the year 2021, and shown on the Rio Blanco County Abstract of Assessments submitted by me to the Division of Property Taxation.

Please note this valuation is subject to change by the State Board of Equalization.

Sincerely yours,

Renae T. Neilson
