

Town Council Packet
June 14, 2022 @ 7:00pm

1 – Agenda

GUIDELINES FOR PUBLIC INPUT

Public Input is a vital and important portion of every meeting and will be permitted throughout the meeting, but according to the following guidelines:

- a. Public input is allowed during the Agenda identified **Public Input** and **Public Hearing** portion of the meeting.
 - i. If you would like to address the meeting during the appropriate times, please raise your hand and when called upon you will be asked to come to the podium. ***Announce your name*** so that your statements can be adequately captured in the meeting minutes.
 - ii. ***Please keep your comments to 3-5 minutes*** as others may want to participate throughout the meeting and to insure that the subject does not drift.
- b. Throughout the meeting agenda calls for public input will be made, generally pertaining to specific action items. Please follow the same format as above.
- c. At the conclusion of the meeting, if the meeting chair believes additional public comment is necessary, the floor will be open.

We hope that this guideline will improve the effectiveness and order of the Town's Public Meetings. It is the intent of your publicly elected officials to stay open to your feelings on a variety of issues.

Thank you, Rangely Mayor

Town of Rangely

June 14, 2022 - 7:00pm

1. **Call to Order** – 7:00pm
2. **Roll Call** – Andy Shaffer, Don Davidson, Kyle Wren, Tim Webber, Alisa Granger, and Todd Thayn present.
Trey Robie absent
3. **Invocation** – Led by Tim Webber
4. **Pledge of Allegiance** – Led by Lisa Piering
5. **Minutes of Meeting**
 - a. *Discussion and Action to approve the minutes of May 10, 2022, Town Council Meeting* – **Motion made by Alisa Granger to approve the minutes of May 10, 2022, Town Council Meeting, second by Don Davidson. Tim Webber abstained. Motion passed**
6. **Petitions and Public Input** - None
7. **Changes to the Agenda** - None
8. **Public Hearings - 7:10pm** - None
9. **Committee/Board Meetings** – RDA/RDC meeting was held discussed grant/loan program to review. Jocelyn also gave an update on Cogency and the Just Transition grant was award for the river put ins at the camper park. Hosted the Dinosaur Diamond board at the Car Museum and discussed promoting all the communities along the Dinosaur Diamond. Lisa and Jeannie attend the Main Street conference.
10. **RBC Commissioner Reports** - None
11. **Council Reports** - None
12. **Supervisor Reports – See Attached**
 - a. *Chief Hamblin* – Chief Hamblin reported that calls have increased as the weather has become warmer. He also stated that their mental health calls have increased. Chief Hamblin reported that there has been personnel changes within the department. Officers attended leadership classes. Coffee with a Cop is going well but plan on changing the date from a Wednesday to a Saturday starting in June. Chief Hamblin hopes that will allow for more community involvement. The police department assisted with the ROAR event, and it went well. The High School had Rowdy Worm and the PD provided two employees. The Police Department also participated in the Health Fair. Chief Hamblin sworn in Officer Duke, and she was pinned with parents and family in attendance. Officer Duke introduced herself to the council, she stated that she attended CNCC and went through the NPS program.

13. Reports from Officers – Town Manager Update – Lisa reported to the council that the winds kicked up again and caused more damage to the water treatment plant. Seasonal hires are starting. Jon has started fogging and will do so as the wind allows. The Rangely High School Baseball team volunteered and painted all the curbs with Jeff LeBleu. Patrick Scoggins also completed a mural on south Stanolind and looking at also doing one on south White Ave. Lisa informed the council that CML is doing a couple of webinars and they are for elected officials. Michael Bennet is trying to create a National Energy Community Transition Act. Kelly will be putting an article in the Rangely Review about the gas system, as Rangely is one of the few municipalities that have our own system. It will give people a little education about it. Lisa Jones is trying to get out updates on CNCC and will get those out once received. Lisa stated that Lauren Boebert will be in Rangely on June 1st at Elks Park.

14. Old Business

15. New Business

- a. *Discussion and action to approve the April Financial Statement – Motion made by Tim Webber to approve the April Financial Statement, second by Alisa Granger. Motion passed*

16. Informational Items

- a. *TankeRays May 27th*
- b. *RBWCD Fishing Derby June 4-5th*
- c. *Nick Lancaster Memorial Golf Tournament June 4th*
- d. *4th of July Events*
- e. *WeRock July 9-10th*

17. Board Vacancies

- a. *Community Garden Board Vacancies*

18. Scheduled Announcements

- a. *Planning and Zoning meeting is scheduled for the June 2022*
- b. *Community Outreach meeting is scheduled for June 6, 2022, at 6:00 pm.*
- c. *Rangely District Library Board meeting is scheduled for May 9, 2022, at 5:00 pm*
- d. *Western Rio Blanco Park & Recreation District Board meeting is scheduled for May 9, 2022, at 7:00 pm*
- e. *Giant Step Preschool Board meeting is scheduled for May 11, 2022, at 6:00 pm*
- f. *Rural Fire Protection District Board meeting is scheduled for May 16, 2022, at 7:00 pm*
- g. *Rangely School District Board meeting has been scheduled for May 17, 2022, at 6:15 pm*
- h. *Rangely Junior College District Board meeting is scheduled for May 17, 2022, at 12:00 noon*
- i. *Rio Blanco County Commissioners Board meeting is scheduled for May 17, 2022, at 11:00 am*
- j. *RDA/RDC Board meeting is scheduled for May 19, 2022, at 7:30 am*
- k. *Rangely Chamber of Commerce Board meeting is scheduled for May 19, 2022, at 12:00 noon*
- l. *Rio Blanco Water Conservancy District Board meeting is scheduled for May 25, 2022, at 6:30 pm*
- m. *Rangely District Hospital board meeting is scheduled for May 26, 2022, at 6:00 pm*

19. Adjournment – 7:51pm

ATTEST:

RANGELY TOWN COUNCIL

Marybel Cox, Clerk

Andrew Shaffer, Mayor

8 – Public Hearings

- 9 - Committee Meeting
- 10 - Report from RBC Commissioners
- 11 - Report from Council
- 12 - Reports from Supervisors

May 2022 - Supervisor Reports

POLICE DEPARTMENT – SUBMITTED BY POLICE CHIEF, TIRYNN HAMBLIN

Project status/Current Issues

Communication Division:

- **1053** calls for service through the communication center
- **70** calls for 9-1-1 services
- **4**- 9-1-1 misdials/ hangups **Patrol Division:**
- **279** incident calls for various crimes occurring or occurred
- **37** - cases **49**– traffic contacts **193**- incidents
- Responded to 4 alarm(s)
- **12** animal control calls for service
- **65** – calls for service to assist other agencies, **19** – ambulance, **11**– fire department, **20** – sheriff, **6** -CSP, and **9**- others.
- Citizens Assist **103** – incidents for vin inspections, civil stand-by's, test pages, business checks and others.
- Property crimes **14** – theft from building, possession/receiving stolen property, fraud, misc. thefts, lost/found property, missing person, vandalism.
- Crimes against person **19**- Disturbances/disorderly, domestic violence, harassment, suspicious person complaints.
- Sex Offender Registration/ Verification- **2**
- Missing Person(s)- **1**
- Juvenile – **0**
- Attended/Unattended death- **4**
- **4**- Arrests, **1**- booked into the Moffat County Jail
- Traffic contacts **49** – traffic contacts, **0**-accident(s), **2**- citation(s), **47**- warnings, **15** of the traffic contacts were citizens of Rangely.

Personnel Issues:

- Officer Duke was sworn in before Town Council.
- Conducted Animal Control/ Code Enforcement interviews
- Conducted Dispatcher Interviews.

Notable issues:

- The Police Department assisted with the ROAR OHV Rally. Huge success with no major issues.
- Assisted the High School with Prom and Rowdy worm.
- Lt. Garner, Officer Millard and Officer Duke attended Crisis Intervention Training in Hayden, Colorado.
- Officer Burr and Duke attended Intoxylizer training and are now certified.
- The Rangely Police Department attended the NPS Ranger Academy graduation at CNCC.
- Chief Hamblin taught SFST in Platteville, Colorado. Officer Duke attended this course and completed it.
- The Police Department attended First Responder Day held at the Early Education Center.
- The Police Department attended the Health Fair held at the hospital.
- Lt. Garner attended a handgun instructor course in Dillon, Colorado.
- The PD held our 4th Coffee with a cop event. This date has been moved to Saturdays to allow more to attend.
- The PD attended Traffic Incident Management (TIM) training hosted by State Patrol.

GAS DEPARTMENT/Building & Grounds – SUBMITTED BY KELLI NEIBERGER

Project status/Current Issues:

- Meter Reading, get reads off large meters, go over reports and meter proof, make corrections, reprogram meters, final meter proof, recheck proof after gas rate calculated – make final changes
- Weekly charts, pressures, and odorant level check
- Weekly check of Border Station and odorant injection system
- Gas usages and rate for May
- Average low temperature for April
- Leak Calls – 1
- Customer Calls – 0
- Carbon Monoxide tests - 0
- Locates for May - 19
- Work Orders – 27
- NPSO – (Non-payment shut-offs) – started with 9 and 1 was shut off
- Call Schedule June
- Public Utilities Committee zoom meeting on upcoming changes to rules and regulations
- Work on Operator Qualification records and filing
- Training on radio to be used when cell service is down or in an emergency where we need to stay in contact with multiple entities (Fire, EMS, Police, etc.)
- Continue with PMCs (Periodic Meter Changes) – we are over half-way done
- Leak Survey – Section 4 of Town, Aldyl-A, and other areas of concern
- Notify Meeker Sand and Gravel of leak on their fuel line. Gas was shut off until they decide how to proceed.
- Finish Cathodic Protection survey and paperwork
- Atmospheric Corrosion Survey
- Summer hire came to work, training was completed
- Spray for mosquitoes and put larvicide in areas where there is standing water
- Work orders for White River Village residents
- Weld light covers for police department jail cells
- Work on White River Village Apt. #2 – apartment is being redone (new paint, carpet, vanity, etc.)
- Sprinkler system repairs at Town Hall, White River Village and East Entrance
- Sprinkler system repairs at the Museum
- Pull dead tree at Poole Memorial
- Mowing
- Spray weeds
- Sanitize surfaces at shop and in office
- Clean shop and wash trucks

Personnel Issues/Events:

Notable Issues/Events:

- Town Council members toured the Town's facilities

Public Works– Submitted by Jeff LeBleu

Project status/Current Issues:

Crew Activities:

- Burn at pit
- Utility locates
- Install pedestrian signs on South White Ave
- Vehicle and equipment maintenance
- Haul dirt to hospital lot
- Cut weeds
- Repair curb stop on South White
- Seep streets
- Clean gutters
- Rangely High School baseball team painted the curbs on Main Street
- Repair water break on Striegel Hill
- Office work
- Mow and clean up vacant lots
- Saw cuts on Halfturn Rd
- Put up flags
- Service fire hydrant at Rec center
- Take down flags
- Build and hang flowerpot hangers

Personnel issues:

Notable Issues/events:

Water/Wastewater – Submitted by Donald Reed

Project status/Current Issues:

Water Treatment Plant:

- Spring runoff is here, and the river is flowing well. We're right on par with what we expect influent turbidity (<10 NTU) to be this time of the year. We're treating the water and maintaining an effluent below 0.1 NTU, which is excellent.
- We are currently fluctuating between 95-105% snowpack, which is wonderful. We don't foresee any issues with flows later this season but will continue to monitor daily.
- We still don't have any data trending for the USGS flow monitoring site at Boise Creek, which is our go-to flow monitoring site. We contacted USGS and they said that this monitoring site is down temporarily while they work on a bridge project. They hope to have it back up soon.
- Average daily water output from the plant in May was 581k gallons.
- Water loss for the month was at 11.9%.
- Monthly compliance reports were sent to state with no violations being noted. We did need to update the method of how we submit alkalinity results, but everything else remains the same.

- The water treatment plant's roof had a few temporary repairs done to it by Hurst roofing until they could get material in for a permanent repair. However, a separate section of the roof membrane has blown off and we now need to repair the entire roof. We are still waiting for Hurst to procure all the necessary materials.
- Because of the new section being damaged, we've had a lot of venting damaged as well. Prater Plumbing came out to evaluate the damage last week and we're still just waiting to hear from them on what repairs will be.
- High zone pump station roof is still waiting to be repaired. We have a contractor lined up to complete the work, we're looking to have it completed sometime in June.

Wastewater Plant:

- Mueller has now finished concrete work on the effluent wetwell and has the slab and walls complete for the influent wetwell. This week they will be stripping down the both the influent and effluent wetwell in preparation to apply the waterproof coating and beginning formwork, rebar, and penetrations for influent wetwell lid. Following that, Mueller plans to install water stop and will be pouring the influent wetwell lid.
- We've been monitoring the new pipe connections inside of the existing headworks and it appears to be holding.
- Our grit chamber has been having issues, so Joe has been working on getting it unplugged over the last couple weeks.
- Our hoist in headworks used to haul trash from the bottom level has begun to fail. We've opted to replace the hoist with a cheaper option to get us by until the new building is online.
- Irrigation at the wastewater plant is now operational. It needed to be repaired at the meter set due to splitting pipe fittings.
- State Compliance Reports were sent out with no violations.

Utility Department Activities:

- Had 20 locates, meter reads and rereads, several work orders, high/Low usage report.
- Storm sewer cleaning cannot resume until we get our rudder pump fixed. Vac truck is still waiting for repairs and is at Farris Machinery in GJ.
- Attended meetings with PAC and the Conservancy meeting.
- Irrigation is running smoothly, however, we're getting erratic level reads when there are storms. We've been looking into it but can't find the issue.
- It has come to our attention that a house up on La Mesa has been experiencing lower water pressure and flows since we've replaced their line. We had the contractor come up and verify that the connection to the customer's piping was ok, and everything was fine. We tested the pressures and flows of the water at that point, and we've concluded that we need to upsize that particular service line. We're hoping to get that done within the next few weeks.
- Several more facilities have completed their backflow preventer tests and so we're around 25% in compliance for the year. Need to reach 85% by the end of the year.
- We've interviewed a few different people from the community for the utilities position.

Personnel issues:

Notable Issues/events: *N/A*

Animal Shelter– Submitted by Linda Farney

Project status/Current Issues:

- 20 Running At Large
- 3 Impounded
- 3 Reclaimed
- 3 Dogs Relinquished
- 1 Cat Relinquished
- 1 Ticket issued

Personnel Issues/Events: *N/A*

Notable Issues/events: *N/A*

WRV/Liquor-Code Enforcement– Submitted by Janet Miller

White River Village:

Project status/Current Issues:

- Processed 2 tenant recertifications and sent to USDA
- Regular maintenance and cleaning are always ongoing
- All common areas are being sanitized daily to decrease the risk of Covid spread.
- Tenant moved into apartment 2. Facility is full.

Personnel Issues/Events:

Notable Issues/events:

Liquor Licensing:

- Processed 0 Renewal Liquor Licenses and sent to State for processing

Special Event Permit:

Main Street/Town Hall:

- Finished spring cleanup of Poole Memorial
- Planted annual flowers in circular planters at Town Hall and Poole Memorial
- Put all Town flowers along Main Street
- Put new hanging baskets at Town hall courtyard and the library
- Did spring cleanup at Town Hall Courtyard and in front of Town Hall at the entrance
- Watering and deadheading of Town flowers and all Main Street is being done daily

Notable Issues/events

Personnel Issues/Events:

- Summer hires started this month.

Planner/Town Engineer - Submitted by - Jocelyn Mullen PE

Project status/Current Issues:

- **Headworks Replacement Project Grant**
 - Work continues on new Headworks construction. Crew is almost done with influent and effluent wetwells now. They expect to leak test both tanks and begin backfilling in the next few weeks. Town is performing sampling and monitoring tasks for Mueller Construction, for fees. Executed Change Order #2 to restore full scope of electrical and mechanical work removed for cost savings last fall.
- **Soliciting engineering bids on Halfturn Waterline Replacement project**
 - Received 1 bid from Bohannon Huston for \$46,000 for engineering design.
 - Waiting for a bid from SGM for comparison
 - Waiting for repair of Vac Truck to pothole multiple locations along the line to determine depths and conflicts prior to starting engineering work
 - Planning on applying for Sept 1 DOLA EMIG Grant cycle
- **CDOT rejected our Main Street grant application for \$1.6 M** to rebuild the east entrance to Rangely
- **Cogency project development work**
 - Cogency waiting for financing
- **Grants on the Horizon**
 - Turned in budget and SOW to Office of Just Transitions for our \$396,255 grant to improve river access at Camper Park.
 - CDPHE joined AGNC, and Main St to provide \$5000 additional funds to add 4 more solar lights on the Kennedy Drive Multi-Use Path north of the lights we added last year.
 - Planning on applying for an EDA Travel and Tourism Grant or Colorado Tourism Office grant to improve 2 additional river access locations in Town
- **6. Planning work**
 - NOAs, calls and emails regarding planning, development and building questions
 - Working with potential new owners for a special use permit for Ellingwood Park
 - Addressing potential Fire Code problems with Phase 2 of Adora Inn apartment conversion

The High DESERT MILE

**COME RACE ONE MILE DOWN RANGELY'S
MAIN STREET ON SATURDAY, JUNE 11
2022**

**CHECK IN OPENS AT 8:00AM, RACES START AT
9:00AM AND 9:30AM**

825 E Main Street

The check in and start of the race will be at 825 E Main Street, in the parking lot between Giovanni's and Nichols. The race will be exactly one mile down Rangely's scenic main street.

Open and Elite Heats

There will be two heats. An open heat will be available for any and all to walk, jog, run, and race. An elite heat will recommend an entry time of under 7:30 for women and 6:30 for men. Top 3 female and male finishers in each heat will receive a one of a kind trophy.

\$20 Entry Fee

This entry fee will help cover the costs of a timing system, providing food and drinks, and ensuring that every participant gets a t-shirt. All additional proceeds will go towards supporting current/former Rangely High School athletes with costs associated with sports.

SIGN UP ONLINE OR <https://www.signupgenius.com/go/10C0E48ACAD2CA1FEC07-thehigh>

Statement of Andrew Mueller, General Manager
Colorado River Water Conservation District
Glenwood Springs, Colorado

The Western Water Crisis:
Confronting Persistent Drought and Building Resilience on our Forests and Farmland

Hearing of Subcommittee on
Conservation, Climate, Forestry, and Natural Resources
United States Senate

June 7, 2022

Chairman Bennet, Ranking Member Marshall, members of the subcommittee, thank you for the opportunity to speak with you today about these important issues.

My name is Andrew Mueller and I'm the General Manager of the Colorado River Water Conservation District. For over 80 years, the Colorado River District has worked to protect the water interests of Western Colorado and keep water flowing west. We manage, conserve, develop and protect the West Slope's water on behalf of the State of Colorado and the citizens of our 15 counties that form the headwaters of the Colorado River and its principal tributaries. We are also responsible for the conservation, use and development of the water resources of the Colorado River Basin to which the State of Colorado is entitled under the 1922 and 1948 Colorado River compacts.

The precipitation in our district alone provides 65% of the Colorado River's natural flows, a river system that supports over 40 million people, 5 million acres of agricultural land, 2 countries, 30 sovereign Tribal Nations, 7 states and 11 national parks. We are the first link in an immense chain, vital to the health and future of the single most important natural resource in the American Southwest. It all starts in our headwaters state.

I. Identifying the Single Biggest Threat to Water Security in the American Southwest

Climate Change & Aridification:

The Colorado River is aptly referred to as the hardest working river in America. Even in wet years, the river no longer reaches its natural mouth at the Sea of Cortez and claims to water exceed the average annual flow. The massive system of federal reservoirs on the Colorado River was designed to accommodate the known natural variability in the Colorado River System and worked extremely well for at least half of a century. However, after the longest and most severe drought on record, that once highly functioning federal system is dangerously depleted with only 34% of system

storage remaining.¹ Over the last 22 years, the flows of the Colorado River have been 20% below average and sound science tells us we should anticipate and plan for further significant reductions in flow. To say that all thriving urban and rural communities and the natural ecosystem of the river face a gravely uncertain future is not hyperbole. While we may hope for a cooler wetter future, those of us responsible for our region and nation's water security must pay attention to credible science and plan for the worst. Our nation's leaders must understand what is happening and what lies at the root of this accelerating crisis.

Climate, commonly defined today as the average weather over a thirty-year period², has always been variable in the American Southwest. We have experienced long dry periods interspersed with generally shorter wet and cooler periods. The climate we have experienced in the last twenty years, however, has been hotter and drier than any period in the last 1200 years³. It is indisputable that the climate of the American Southwest has changed dramatically since the start of this millennium. Climate is generally a combination of meteorological variables, importantly including but not limited to temperature and precipitation. Like many meteorological variables, temperature and precipitation are related to one another. In many regions, higher temperatures enable the atmosphere to hold more moisture and therefore result in greater, more severe precipitation events. We see these extreme weather events in many parts of the United States today. In the desert southwest, however, higher temperatures have generally led directly to the aridification or massive drying of the earth's surface. Hotter temperatures over last 22 years have literally sucked the moisture right out of our snowpack, soil and vegetation.

Important for today's hearing is our growing understanding of the relationship between rising temperatures and the volume of water flowing in the Colorado River and its tributaries. Colorado's Western Slope, and the entire Colorado River Basin continue to suffer from the effects of multi-decadal drought and increasing temperatures. The West Slope, the most significant regional source of water in the Colorado River, is an epicenter for a significantly above-average rise in temperature. Colorado counties from Ouray to Mesa to Moffat have experienced a more than 4-degree Fahrenheit rise in average annual temperatures since 1895.⁴ The impact of these hotter, drier temperatures on water supplies are real and meaningful. For every 1-degree Fahrenheit rise in average temperature, we see streamflow reductions between 3% and 9%, with most recent studies, including the most recent and in-depth study by the scientists with the United States

⁴ National Oceanic and Atmospheric Administration's [Climate Divisional Database \(nClimDiv\)](https://climate.geog.udel.edu/), monthly temperature data at the national, state and county levels between 1895 and 2019 for the Lower 48 states.

Geological Survey strongly supporting the 9% end of the spectrum.⁵ The credible scientific consensus is that we should expect temperatures to continue to rise and therefore natural stream flows and water supply to continue to decrease.

Throughout the headwaters of the Colorado River we have experienced year after year of hot and windy Springs and early Summers that cause our snowpack (which in the American west is our single largest reservoir) to sublime, or turn directly from its solid state to a gas leading it to disappear into the atmosphere instead of melting and flowing into our rivers. Soil aridification significantly compounds streamflow issues. As temperatures rise, moisture evaporates from our plants and soils, creating a massive water debt due when snows melt, drawing water away from rivers and streams. Never has this issue been clearer than in 2021, when our headwaters snowpack averaged at 89% while inflows to Lake Powell reached only 32%.⁶

Fires in this new arid environment burn hotter and faster and behave in wildly explosive ways. In 2020, Colorado experienced the three largest wildfires in recorded history — all in the same season. Watersheds and water infrastructure on both sides of the Continental Divide were seriously impacted by wildfire, resulting in hundreds of millions of dollars in restoration and mitigation expenses in the Centennial State alone. My own hometown of Glenwood Springs, a town of less than 10,000 residents, experienced this first-hand with the significant destruction of our city's watershed in the Grizzly Fire leading to the emergency expenditure of tens of millions of dollars. These continued drought conditions have renewed regional fears of another catastrophic wildfire season that could further damage critical watersheds and negatively impact agricultural and municipal water supplies.

Family Farms & Ranches in Crisis:

None have felt these climate impacts more than the family-owned farms and ranches of our Colorado River District and Colorado's Western Slope. The food and fiber produced from our region sustains communities across the state and the nation, but drought-based water scarcity has forced many local producers to downsize or completely shut down their operations.

Cattle sell-offs, or "de-herding," has become commonplace across the agricultural communities in our 15 counties. Not only does this practice impact local economies and our national food supply, but it also holds great emotional weight and repercussions for these families and their neighbors. Families that have been involved in and committed to ranching for four and five generations are being forced to sell their cattle herds and confront a tremendously uncertain future.

⁵ Changing climate drives future streamflow declines and challenges in meeting water demand across the southwestern United States (Olivia L. Miller; et al, Journal of Hydrology, vol. 11, May, 2021); Colorado River flow dwindles as warming-driven loss of reflective snow energizes evaporation (P. C. D. Milly, K. A. Dunne, Science 2020)

⁶ Calculations from NOAA and the Colorado Basin River Forecast Center with data from <https://www.cbrfc.noaa.gov/lmap/lmap.php>

While our agricultural producers regularly experience natural fluctuations in the hydrology each year, these River District constituents, regardless of political affiliation, recognize this recent period as the hottest and driest in collective memory. The latest scientific data establishes that this era is the driest in over 1,200 years⁷ and they are looking to our regional and national officials for leadership in this uncertain time. Our present and most likely future reality is hotter and drier with declining water supply. This reality presents a risk to all of our communities in the American Southwest and threatens our nation's water and food security. Confronting and developing adaptation and mitigation strategies is the only way to secure our collective water and food security.

II. Adaptation and Mitigation Strategies Must be Developed, Funded and Implemented.

Our country has a long and admirable history of innovation and adaptation to climate. Tremendous engineering feats driven by individual ingenuity and funded by local state and federal governments has allowed cities and farms to thrive in a hostile and arid environment in the American Southwest. While this quickly changing climate can lead to despair and hopelessness, we cannot simply throw up our hands and surrender our thriving American Southwest to the forces of climate change. Citizens, communities and governments throughout the Southwest are developing adaptation strategies, but as in the past, when our nation has been confronted by existential threats, we need our national government to be an integral partner in our effort to adapt and thrive in this new reality. There are many examples of successful adaptation strategies and many opportunities for the federal government to work hand and hand with our local and regional efforts. And we must recognize that there is no single answer which will allow us to escape this rapidly changing climate, it must be a multi-faceted effort. I will discuss a few concrete examples within our District as well as address a few larger regional efforts which are worthy of your consideration.

The Use of High Mountain Reservoirs for Climate Mitigation:

Hotter temperatures and the long-running drought have reduced runoff across Colorado's Western Slope, creating unprecedented conditions in our river basins. In 2018, the Colorado Division of Water Resources placed the mainstem of the Yampa River – one of the major Colorado River tributaries – under active administration for the first time in history, shutting down water diversions for local agricultural producers. In a river that historically enjoyed plentiful natural flows, there simply was not enough water to meet all the historical demands. Unfortunately, 2018 was not an anomaly. The Yampa system experienced administrative curtailment in both 2020 and 2021, and we are anticipating the same again in 2022.

Unprecedented drought has also led to unprecedented innovation and collaboration. Last year, the Colorado River District, working cooperatively with the State of Colorado and other partners, helped keep the call off the river to aid downstream farmers and ranchers with releases from Elkhead Reservoir. Managed by the Colorado River District, Elkhead Reservoir provides multi-

⁷ A, P. W., Cook, B. I., & Smerdon, J. E. (2022). Rapid intensification of the emerging southwestern North American megadrought in 2020–2021. *Nature Climate Change*, 12(3), 232–234. <https://doi.org/10.1038/s41558-022-01290-z>

purpose water storage that enhances river flows, provides water for electric power production, supports agriculture and livestock production, and provides significant water to protect the four endangered fish in the Upper Colorado River system.

It is widely acknowledged that the era of building enormous reservoirs such as Powell and Mead is over. It is, however, an era in which strategically placed small reservoirs in our high mountain valleys will allow us to successfully mitigate climate change through the retiming of flows which will provide essential water for our streams, our communities and our food supply. Federal assistance, through funding tools like PL 566 will be essential to our effort to adapt and retime water.

Implemented & Ongoing Local Solutions:

Improving the efficiency and enhancing the conservation of water through infrastructure investment is critical to the future viability of the American Southwest. The Lower Gunnison Project is an excellent example of a successful local effort funded, in part with federal dollars. The project recently celebrated the completion of its first phase, working in partnership with the agricultural community to modernize conveyance systems and upgrade to high efficiency irrigation systems. The Project secured \$8 million in funding from the NRCS under RCPP and additionally leveraged over \$10 million in funding. Accomplishments included piping nine miles of irrigation canals and installing a regulating reservoir and measurement sensors that collect and record data. The estimated benefits generated by this series of projects are expected to last for decades and is equivalent to \$1.3 million per year.⁸ This includes salt load reductions, operations and maintenance savings, producer benefits and reduced travel costs. The project is also directly linked to the successful restoration of the water quality in the Lower Gunnison River, an essential water supply for cities, farms and endangered fish. We applaud Senator Bennet's efforts to champion the RCPP Program, paving the way for success in the Lower Gunnison of Colorado.

Building Resiliency Through Natural Infrastructure:

The greatest reservoir for the Colorado River and our water users on the West Slope is our high-mountain snowpack in our forest headwaters. The natural water infrastructure our mountain forests provide allow for slow-timed releases and filtration for the rivers and streams sourced for community drinking water, irrigation and essential habitat for fish and wildlife. Protecting, restoring and properly managing these forest ecosystems can generate incredible public benefits, enhance resilience to climate change and improve water supply.

Emerging science also demonstrates that protecting and restoring natural water infrastructure can help mitigate the impacts of wildfire and drought on water supplies.⁹ The 2023 Farm Bill presents

multiple opportunities to encourage public investment in forested natural water infrastructure, enhancing the climate resilience of water supplies, supporting workforce development and increasing the pace and scale of watershed restoration.

Keeping Productive Agriculture Viable:

The multi-decadal drought and conclusive climate science clearly demonstrate that our demands greatly outstrip the water supply in the Colorado River Basin. To survive and continue to thrive in the Southwest, we will need to implement an all-hands-on deck approach. Every water use sector from agriculture and industry to municipal water users will have to meaningfully reduce their consumption of water.

The majority of water consumed in the Colorado River Basin is consumed in the production of food and fiber for our nation. Agriculture in the Colorado River Basin is important to our local, regional and national food supply, and is essential to this nation's food security. We must devise, implement and fund programs aimed at keeping productive agriculture viable while reducing the overall consumptive use of water. Conservation and efficiency programs like RCPP incentivize the transition to lower water demand crops and programmatic soil health efforts – all pieces of a successful effort. Yet even with these endeavors, we will unfortunately still need to intelligently incentivize the reduction of irrigated acreage in the Basin.

Our agricultural producers in the Colorado River Basin are and always have been innovative individuals, and we should look to them for ways to model incentives and programs. When faced with a dry year and low water supply, our farmers and ranchers in Colorado and elsewhere in the Upper Colorado River Basin routinely chose to reduce or remove irrigation from their least productive lands in order to sustain their most productive acreage. If Congress is going to incentivize the reduction in irrigated acreage in the Colorado River Basin, any such program must focus on supporting our most productive agricultural land while focusing the incentives on hobby farms (i.e. 35 acre and smaller tracts irrigated primarily for aesthetic purposes) and marginally productive lands. The federal government should not fund the retirement of productive agricultural lands.

Incentivizing hobby farm and marginal land fallowing for longer periods of time will allow for the long-term success of productive agriculture in the Colorado River Basin, as it provides an incentive to focus scarcer water resources on land that produces more consistently profitable crops. Confronting the system imbalance in the Colorado River Basin will require bold and transformational choices, and we support the frank discussion of these policy goals and ideas. Confronting the crisis on the Colorado River will require strong federal leadership and action.

Coordinated Federal Funding Efforts:

Thank you, Senators, for the passage of the Infrastructure Investment and Jobs Act and your support for Western Water infrastructure. With the infusion of federal infrastructure dollars, there

is no better time to ensure that our federal systems and programs work efficiency together. As an example, we encourage the swift adoption of a Memorandum of Understanding between the NRCS and the USBR to streamline the NEPA compliance process and eliminate duplicative costs, time delays and inefficiencies. We also support greater collaboration and a reduced reliance on autonomous business centers at the federal level that often act as silos and create barriers for local community collaboration and support.

Additionally, our water users are experiencing significant inflation pressure and supply chain backlogs, resulting in delayed projects and increased costs. These barriers delay projects that modernize our irrigation systems, build resiliency across our landscapes and ensure that our farmers and ranchers can support their livelihoods. This has been particularly visible in the EQIP NRCS funding program. We support reestablishing the index payment rate (IPR) and other cost overrun programs to ensure projects move forward with construction. We also support phased contracting to allow for design and construction to operate on the most current payment rate schedule. Addressing these project barriers will result in more water conservation projects moving from idea to action.

Conclusion:

We've only seen the beginning of the climate crisis in the American West. We cannot afford to remain idle as rivers and reservoirs dry and families shutter their businesses. In our District on Colorado's Western Slope, our water users – particularly our farmers and ranchers – have done more with less for a long while. Bound by our hydrology and expectations downstream, drought and shortages have become familiar companions, regardless of conditions at Lakes Powell and Mead.

But wishing for snow and rain is no longer an adequate game plan at any level of decision-making. If our communities are going to survive in Colorado and downstream, decisive action at the federal level is needed to help us adapt to a hotter, drier future.

We cannot adequately protect our water supply if we're constantly playing defense against depleted snowpack, increasing temperatures, megafires in our forest headwaters and the aridification of our productive agricultural lands.

We must act now to ensure the health and security of our multi-generational farmers and ranchers, our thriving cities, our recreational economies, our native fish and wildlife and our precious landscapes that form the headwaters of the greater Colorado River Basin.

I encourage your support of western water users and, most importantly, the communities and landscapes that bring life to the rest of the American Southwest.

Subject: CLUB 20 Summer Policy Meetings

Help Guide Our Advocacy Efforts!

Policy Committee Chairs & Club 20 Members will have the opportunity to meet to hear pro-con discussions about current policy and issues impacting the region and to evaluate new and existing policy resolutions. Club 20 Policy Committee Meetings also include presentations from subject matter experts & industry leaders.

Stay tuned for committee agendas and more info!

Please note our Policy Committee Meetings are free and open to anyone, so feel free to invite anyone with an interest in Club 20!

Fort Lewis College

Durango, CO

Week 1

July 14

8am-8:30am **Federal Updates**

8:30am-10am **Telecommunications**

10am-12pm **Health Care**

12pm-12:30pm **Lunch Break**

12:30pm-1pm **Health Care**

1pm-2:30pm **Education & Workforce
Development**

4pm-5:30pm **Networking Reception-
Mercy Hospital**

Sponsored by: Centura Health

**Colorado Northwestern Community
College**

Rangely, CO

Week 2

Lunch and venue sponsor:

July 28

Stay tuned for official times!

Room Block Information

*****Please note there are a limited number of rooms available in each location so BOOK SOON!*****

Durango Room Block: Durango Lodge, 150 East 5th Street Durango, CO

\$150 per night, please call (970)-247-0955 and mention Club 20

Room Block Expires: 6/13/2022

Rangely Room Block: Blue Mountain Inn & Suites, 37 Park St. Rangely, CO

\$99 per night, please call (970)-675-8888 and mention Club 20

Room Block Expires: 6/27/2022

Sponsorship Opportunities Available!

Sponsor a Committee!

Choose an individual **committee to sponsor for \$250**

or become a **venue sponsor for \$500.**

Committees Available for Sponsorship:

Telecommunications

Health Care

Education and Workforce Development

Transportation

Tourism and Outdoor Recreation

Public Lands and Natural Resources

Please contact Brittany Dixon at policy@club20.org to get your sponsorship!

Wednesday Evening Activities!

Durango Ghost Tour

On July 13th at 8pm join Horsefly History Tours for the Hauntings and History: Durango Ghost Tour. This walking tour explores the haunted best haunted locations that Downtown Durango has to offer!

The tour costs \$30. Space is limited, so email admin@club20.org to reserve your spot today! **Reservation deadline is July 1st.**

Sponsorship Opportunity: sponsor the ghost tour for \$500, contact Brittany for more info: policy@club20.org

Rangely Automotive Museum

On July 27th at 5pm come visit the Rangely Automotive Museum, one of the few automotive museums in the state. Here you will find a breathtaking collection that is diverse in character and age.

Admission to the museum is \$10. The museum accepts **CASH ONLY.** Please email admin@club20.org to reserve your spot today!

Upcoming Member Exclusive Virtual Town Hall

San Luis Valley Water Rights Issue Virtual Town Hall

On June 15th at 2pm Club 20 is hosting a member exclusive virtual town hall where Senator Cleave Simpson will present on San Luis Valley Water Rights Issue. Join us to engage on this important Colorado water issue. Following the presentation, there will be time for questions.
